Freight That Keeps DIC India Ltd Moving Safely

DIC India Ltd runs on freight that has to match its safety standards: solvent-based and Class 3 flammable cargo moving from plant to distribution network without compromise. That is exactly the freight profile Best Roadways has run for 40 years — high-volume, safety-critical FTL on an owned-first fleet.

800+

OWNED TRUCKS

01

Plant-to-RDC Linehaul

Dedicated FTL capacity from your plants into regional distribution centres — consistent placement through season peaks.

02

Flammable-Cargo Discipline

Hazchem-trained drivers, licensed vehicles, TREM-card compliance and spill protocols for solvent-based and chemical cargo.

03

Inbound Raw Material Legs

Monomers, solvents, packaging and pigments from JNPT and supplier clusters into plants, backed by bonded warehousing at the port.

SCOPE OF SERVICES

- 6W to 22W FTL — plant to RDC and depot linehaul
- Class 3 flammable-liquid movements, fully compliant
- Inbound solvent / monomer / packaging legs to plants
- Bonded & general warehousing at JNPT for imports
- Seasonal surge capacity ahead of peak demand

WHY BEST ROADWAYS

- Owned-first fleet of 800+ trucks — placement you control, not the spot market
- 65+ branches for real ground presence on every lane
- 40 years of chemical-sector FTL without compromise on safety
- Single point of accountability from indent to POD

Season-proof placement: peak-quarter demand breaks spot-market reliability every year. An owned-first fleet holds capacity on your lanes when the market tightens.

PROVEN IN YOUR SECTOR

Best Roadways moves freight for Sudarshan Chemical, BASF, Lanxess, Michelman and Evonik — pigments, resins and coating inputs are daily cargo.

Pick one plant-to-RDC lane this quarter. Give us one lane. We'll prove it.

Prepared for Anirban Shome at DIC India Ltd — happy to walk through any of this on a short call.
